START UP THE DOCKER CONTAINERS

1. Mosquitto
   service mosquitto stop
   docker pull eclipse-mosquitto
   docker run -it --name mosquitto -p 1883:1883 eclipse-mosquitto

   docker exec -it mosquitto /bin/sh
   ifconfig → SAVE IP: 172.17.0.2

   cd /mosquitto/config
   apk add nano
   nano mosquitto.conf
      add: listener 1883 0.0.0.0
         allow_anonymous true
   ctrl+x
   Y

   restart container
2. NODERED (**MAKE SURE YOU RUN VERSION 2.0**)
   docker run -it -p 1880:1880 -v node_red_data:/data --name mynodered
   nodered/node-red

   docker exec -it mynodered bash
   npm install node-red-contrib-influxdb

   restart the container

3. INFLUXDB

   *docker run -p 8086:8086 *
      *-v influxdb:/var/lib/influxdb *
      influxdb:2.0

   docker exec -it influxdb bash
   ip a → SAVE IP: 172.17.0.4
